

For Human and Nature

Operating Manual SW331D, SW332D Solar Drive Movement

No. SW331/SW332/E 05/10

Product Features:

- Solar movement with rechargeable power cell. No changing of battery! Duration of power cell when fully charged is about 6 months (without light).
- Calendar
- Due to energy saving reasons, the **sleep function** activates when the watch lies in the dark for 30 days. When the watch is in the light again, the function will automatically restart.

Table: loading time

luminous source	Illumination	Complete charging
Sunshine	40 klx	8 h
Daylight	10 klx	32 h
Artificial light	5 klx	60 h

Functional principle

Light is the natural power source of this watch, as a solar cell under the transparent watch dial generates it to electricity for the electrical power cell.

General Information of Solar Technology

To avoid damage of the power cell, the watch should always be charged up to its minimum. Therefore it is recommended to store the watch in a light place.

1. Function

Setting Date:

Pull out the crown on Position 1. Set the date due to turn left.

Setting Time:

Pull out the crown on Position 2. Set the time due to turn left/right.

After settings, please push the crown on zero-position, as otherwise the water resistance is not given.

Ensure that the crown is returned to the normal operating position before the watch comes in contact with water.
